SKILLS

- HTML (Expert)
- CSS (Expert)
- JavaScript (Expert)
- TypeScript (Expert)
- PHP (Expert)
- Python (Advanced)
- Java (Advanced)
- Go (Expert)
- C/C++ (Advanced)
- Solidity (Intermediate)
- SQL (Expert)
- Lua (Intermediate)

CERTIFICATES

- [Kong Gateway Certified Associate](#)
- [Understanding the OWASP Top 10 Security Threats SKF100](#)

LANGUAGES

- English (Advanced)
- Bahasa Indonesia (Fluent)

PROFILE

Software Engineer since 2013. A competitive programmer with Go. ThinkPad, Linux, and Neovim user. AWS fanboy. Go for BE and TS for FE. Advances in VanillaJS, jQuery, React, Angular, and Vue.js. Atomic Design, SOLID, Design Patterns, and DDD. 100% test coverage.

WORK EXPERIENCE

SALT Indonesia, Jakarta, Indonesia

2018 - PRESENT

Staff Software Engineer

I started my career as a Back-End Developer, but it wasn't limited to frontend stuff. I optimized the performance and the system for better SEO. The tech stack was PHP, NodeJS, Pimcore, and WordPress.

After two years, I became a Tech Lead. We got a project from Telkomsel, MyOrbit. My job was to transform the monolith into microservices, PHP to GoLang. I helped the team learn GoLang. We applied DDD, EDD, TDD, and TBD. The tech stack was Laravel / Lumen (legacy), Go, gRPC, Redis, MySQL, RabbitMQ, Elasticsearch, InfluxDB, GitLab, SonarQube, Splunk, Kubernetes, and AWS.

I got an offer to be a Go content creator for TutorKoding and a part-time FullStack JavaScript/TypeScript instructor for SALT Academy.

I transitioned to a Staff Software Engineer after almost three years as a Tech Lead. I dived into every technical problem in all Telkomsel projects, reviewed merge requests, suggested better approaches for systems, researched or proved new techniques, provided code samples, built internal apps with Laravel, or libraries in Go, NodeJS, and PHP for developers. I created Kong and KrakenD plugins in Lua and Go.

I contributed to Back-End Coding Standards, reviewed Front-End and Back-End (judging TDD, DDD, and Clean Architecture) developers' technical skills for their promotions, and implemented 100% production-grade spec-driven development in some projects.

Closely Coded, Singapore

2013 - 2014

Web Developer

I converted designs from Adobe Photoshop to HTML and integrated them with Back-End or CMS.
